

iMax Sample Box

Description:

Cardboard sample box to promote the iMax range.

Goal

With the launch of The Lighting Bible 10 New Collection Delta Light presented the iMax collection. An extensive downlighter product family, offering specifiers a toolbox with different application options, covers, led types, lumen packages beam angles, accessories etc.

To present the entire iMax range we have created the iMax flightcase:

<http://www.deltalight.com/downloads/docs/Marketing/SAL-031.pdf>

The sample boxes presented in this document allows you to focus on one specific iMax type.

Please use this sample box during your visits to lighting designers, engineers, architects and interior designers – convincing them that Delta Light has a versatile range of high-quality, competitive and technologically advanced downlighters for demanding project needs.

Work your specifiers and convince them to play with the iMax. Having the sample on hand enables you to show both the quality of the light and the finishing of the product. An ideal scenario would be to select key specifiers in your market, and offer them the iMax box as a sample for them to keep in their office and use in their project discussions.

1/ Description

Black hard cardboard box with black foam insert

2/ Product details
