DELTALIGHT

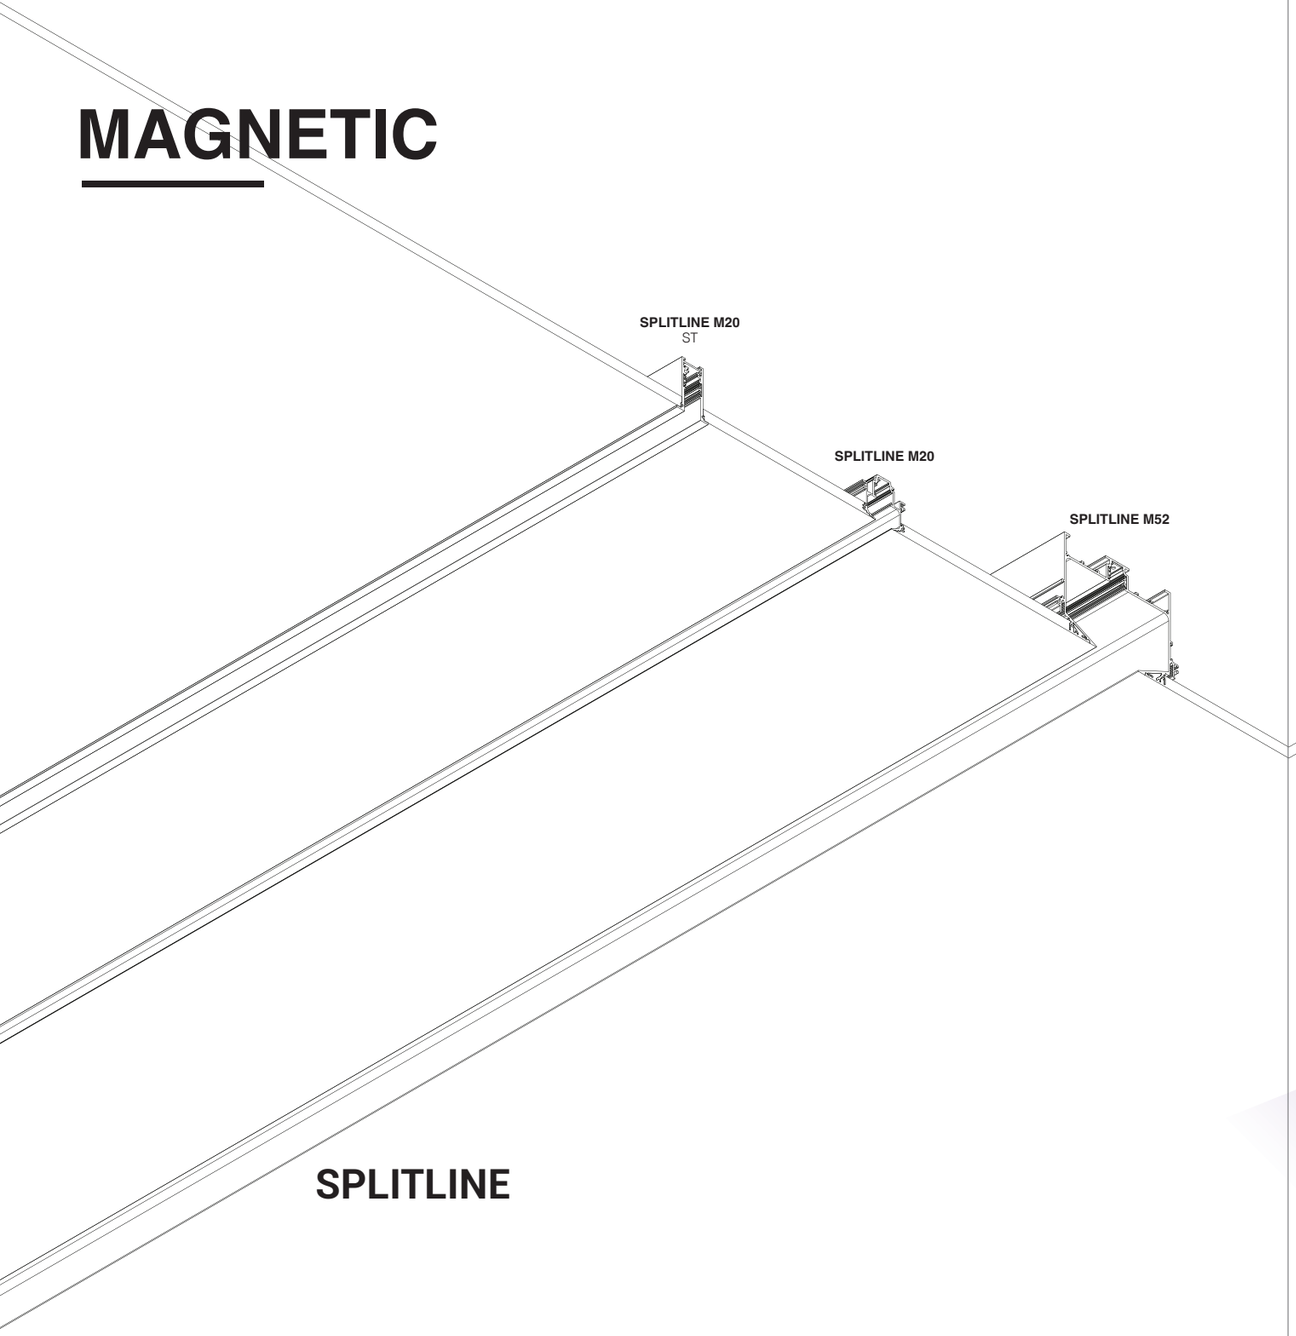
MAGNETIC



SPLITLINE

With the magnetic profiles, Delta Light takes it to the next level in the profile section. These profiles offer the highest degree of freedom and flexibility, as all modules have a magnetic fixation. Splitline M20 and M52 allow for a neat, trimless installation, while Shiftline M26 can be used for projects where surface or suspended mounting is required. To create the optimal light setting, multiple light modules are available: spot modules with different beams and lumen packages going up to 2000lm for accent lighting, linear LED lines for general or wallwash lighting and pendant modules for an elegant finish of the room. All modules can be placed toolfree into the profile and repositioned afterwards thanks to their magnetic fixation. Simply click the module into the profile and both mechanical and electrical connection are ensured. As this family of profiles is powered by 48V, Smart 48 can be used for an easy 2-wire dimming/power solution, or even wireless. For individual control of luminaires, one can opt for a DALI controlled system.

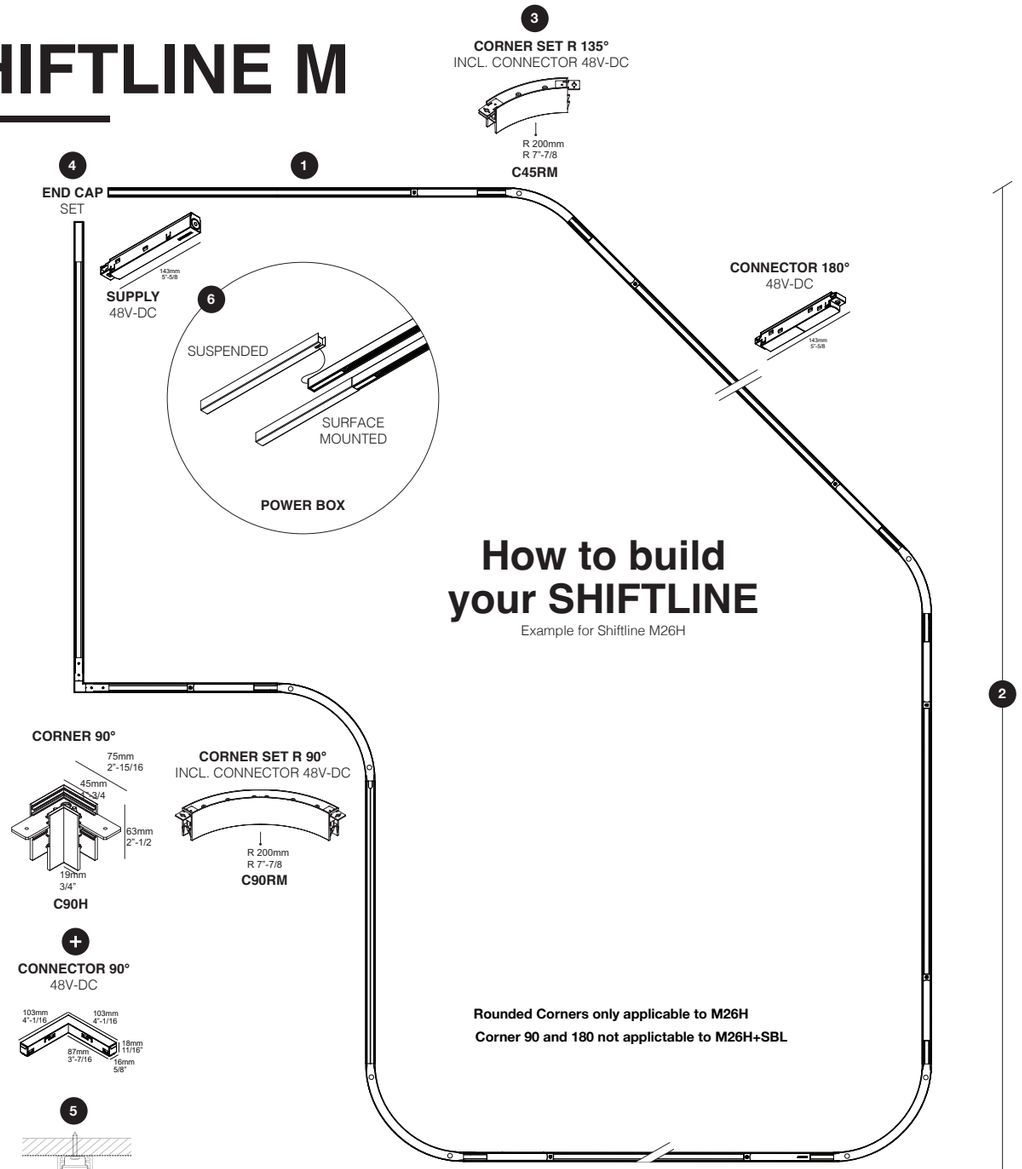
SHIFTLINE M



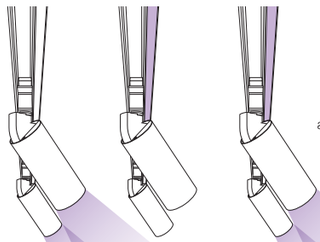
How to build your SHIFTLINE

Example for Shiftline M26H

Rounded Corners only applicable to M26H

Corner 90 and 180 not applictable to M26H+SBL

SLM26H + SBL



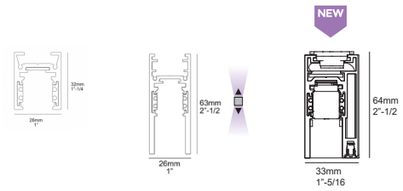
Merging our Shifline M26 H and Tagline profiles into 1, is a perfect example of **1 + 1 = 3.**
The combination of ultimate flexibility with the fine line of light running next to it adds to possible applications for the Shiftline M26 H, as accent lights can be combind with general light without limitations.
Boost your creativity by plugging in any light module you want in the magnetic profile without interrupting the continuous light of Tagline that runs along.
The DALI-powerd 48V solution allows for an easy switch between settings:

Go for **ALL ON**
and light up all light modules at the same time, including the linear Tagline

Go for **ONLY ACCENT**
to switch on the magnetic modules and create a cosy setting by highlighting the accents you prefer

Go for **ONLY GENERAL**
and use the fine line of light for a soft general light effect

Applications are unlimited, but some examples could be to use it in hallways, above the kitchen counter or the bar, as a grid in a restaurant setting, and so on.
Areas where this dynamic solution can transform the atmosphere within the room with a twist of the light.



Unlimited flexibility is what the Shiftline M26 L Matrix system stands for. These clever add-ons to the Shiftline M26 L profiles allow you to couple multiple profiles to each other and create any structure you want. Our 2P Connector not only assures the electrical connection between two profiles, it also serves as a decorative element as its cylindrical shape is perfectly in contrast with the straight lines of the profile. Moreover, this contrast can be enhanced by choosing the Gold Coloured finish for these nodes, a bold statement where design meets functionality.
To complete the Matrix system, an additional ceiling fixation and a non electrical connector allow for unlimited creativity as one is free to connect multiple profiles any way they want. Moreover, the new Side Supply finishes it off in style as it is designed according to the looks of the 2P Connector.
