 DELTALIGHT®

HIGH PROFILE

Delta Light and **MVRDV** present the new High Profile collection. A bold, colourful and conceptual range, inspired by leftover aluminium profiles. The design takes a critical look at the manufacturing process, finding both opportunity and beauty in residual elements that would normally be cast aside.

Aluminum: ductile, light, resistant, but above all durable.

From design to architecture, from decoration to art, aluminum is back in fashion. It knows how to be metallic, reflective and futuristic, or simply powder coated, like the High Profile series from Delta Light and MVRDV.

Bold and colourful

The industrial look is softened by giving the profiles a colour dip; the series comes in pink, random, raw white and turquoise, among others, adding MVRDV's well-known use of expressive colours to Delta Light's typically white, black and gold range.

Wall, ceiling & stand alone

The High Profile series presents a cube-shaped pendant luminaire, a wall fixture in the shape of an arch, and a freestanding model with profiles placed side by side.

Winner: Lighting design of the year 2022.

MVRDV and Delta Light have produced a series inspired by the beauty in elements normally discarded as waste.

MVRDV introduced the idea to develop a new design with Delta Light's waste material, instead of inventing a completely new product. The name stems from profile lighting as a key part of architecture which often produces offcuts as a residual product – these scrap elements became the starting point of the design.

Judges comments:

"High Profile is an ingenious use of discarded materials to create a very strong narrative. The lamp fits into a range of different aesthetics, whether you are going for pastel or metal."

DEPOT BOIJMANS VAN BEUNINGEN

MVRDV

MVRDV was set up in 1993 in Rotterdam, The Netherlands by Winy Maas, Jacob van Rijs and Nathalie de Vries. MVRDV engages globally in providing solutions to contemporary architectural and urban issues. A research-based and highly collaborative design method engages experts from all fields, clients and stakeholders in the creative process. The results are exemplary and outspoken buildings, urban plans, studies and objects, which enable our cities and landscapes to develop towards a better future.

Early projects by the office, such as the headquarters for the Dutch Public Broadcaster VPRO and WoZoCo housing for the elderly in Amsterdam lead to international acclaim. 350 architects, designers and other staff develop projects in a multi-disciplinary, collaborative design process which involves rigorous technical and creative investigation. MVRDV works with BIM and has official in-house BREEAM and LEED assessors. Together with Delft University of Technology, MVRDV runs The Why Factory, an independent think tank and research institute providing an agenda for architecture and urbanism by envisioning the city of the future.

MVRDV

 DELTALIGHT®

"The project started with the question of whether we could develop new possibilities with Delta Light's waste material, instead of inventing a completely new product", says MVRDV founding partner Jacob van Rijs.
