

What if
there is
only one?

DELTA retro.

**What if
there is
only one?**

UNIFORM

One for all.

Entero is a set of lighting tools enabling architects and designers to create discrete but diverse lighting schemes, using only one luminaire type throughout the entire project. Any project. Retail, residential, public, hospitality, art...
Any need. Any size. Anywhere.
It is the most complete family, created to excel in any environment.

COMPLETE

DIVERSE

What
if there
is
only
one?

Inside. Outside.

Entero is engineered to perfection, both for interior and exterior applications. It enables architects and designers to achieve style continuity throughout the entire project, applying the same clean sightlines and minimal appearance to damp locations, outside ceilings and cantilevers.

HYBRID

PRECISE

What
if there
is
only
one?

Intense energy.

EFFICIENT

Entero was designed as an answer to the energy of creation. Crafted to add value to spaces and experiences, bringing intensity to lighting schemes.

A fusion of power and elegance, comfort and precision. One single range of luminaires to illuminate with power or for atmosphere, from low and high.

What if there is only one?

CONNECTED

Entero.

[English] Whole / Entire

Entero. Complete.

[Èn-tè-ro]

adjective / containing all the pieces, whole, very great, without limit, to the largest degree possible

verb / to supply all the pieces needed, to make whole or perfect

What's in a name? It's all in the name! Entero - easiest to translate as "complete".

As a verb, "to complete" is being used when you make something whole or perfect, exactly what Entero does within the Delta Light range of downlights.

It completes the range and makes it perfect to use throughout all type of applications. Be it as a highlight in the room or as a secondary unit for general illumination, to make a setting complete.

"To complete" also means to supply all the pieces needed. Entero as a range exists out of round and square luminaires, for in- or outdoor use, with different types of LED and multiple optical solutions going from superspot to wallwash, available in 3 finishes for standard or trimless installation. All pieces needed for any kind of project, from bedroom to bathroom, from corridor to terrace, from accent light to vertical illumination.

As an adjective, "complete" has some additional meanings like "very great" and "without limit". Entero has no limits.

In need of a very narrow beam? Entero! Want vertical illumination? Entero! Soft dim? Entero! Tunable white for Human Centric lighting? Entero! There are no limits... which is very great!

[Polish] **Caty**

'Looking back to when we first saw the project sheet about Entero, it was clear this was going to be an exercise in balance. A list of must-haves and additional nice-to-haves, combined with keywords as affordable, uniform design, technical yet attractive. A challenge, but a very interesting one. Now, with the end result in hand, we can clearly state that Entero is in balance, both as a product and as a family. The individual product combines a technically perfect engineered back end with a purified front design, while the products as a family show uniform design in different sizes, different application types and different light technical aspects. A balanced outcome.'

Completely as a product as a family.

Paul Amick

**in balance,
et and**

Containing all the pieces.

Entero, as a product, is an easy-to-use tool in a variety of settings. Making abstraction of the product, it contains all the different pieces to make it a working tool for the lighting designer, be it on colour, LED, optic, power or installation. In the end there are 1.204 unique possibilities to choose from, up to you to choose the solution that suits you!

[Greek] Olokiros

One for All.

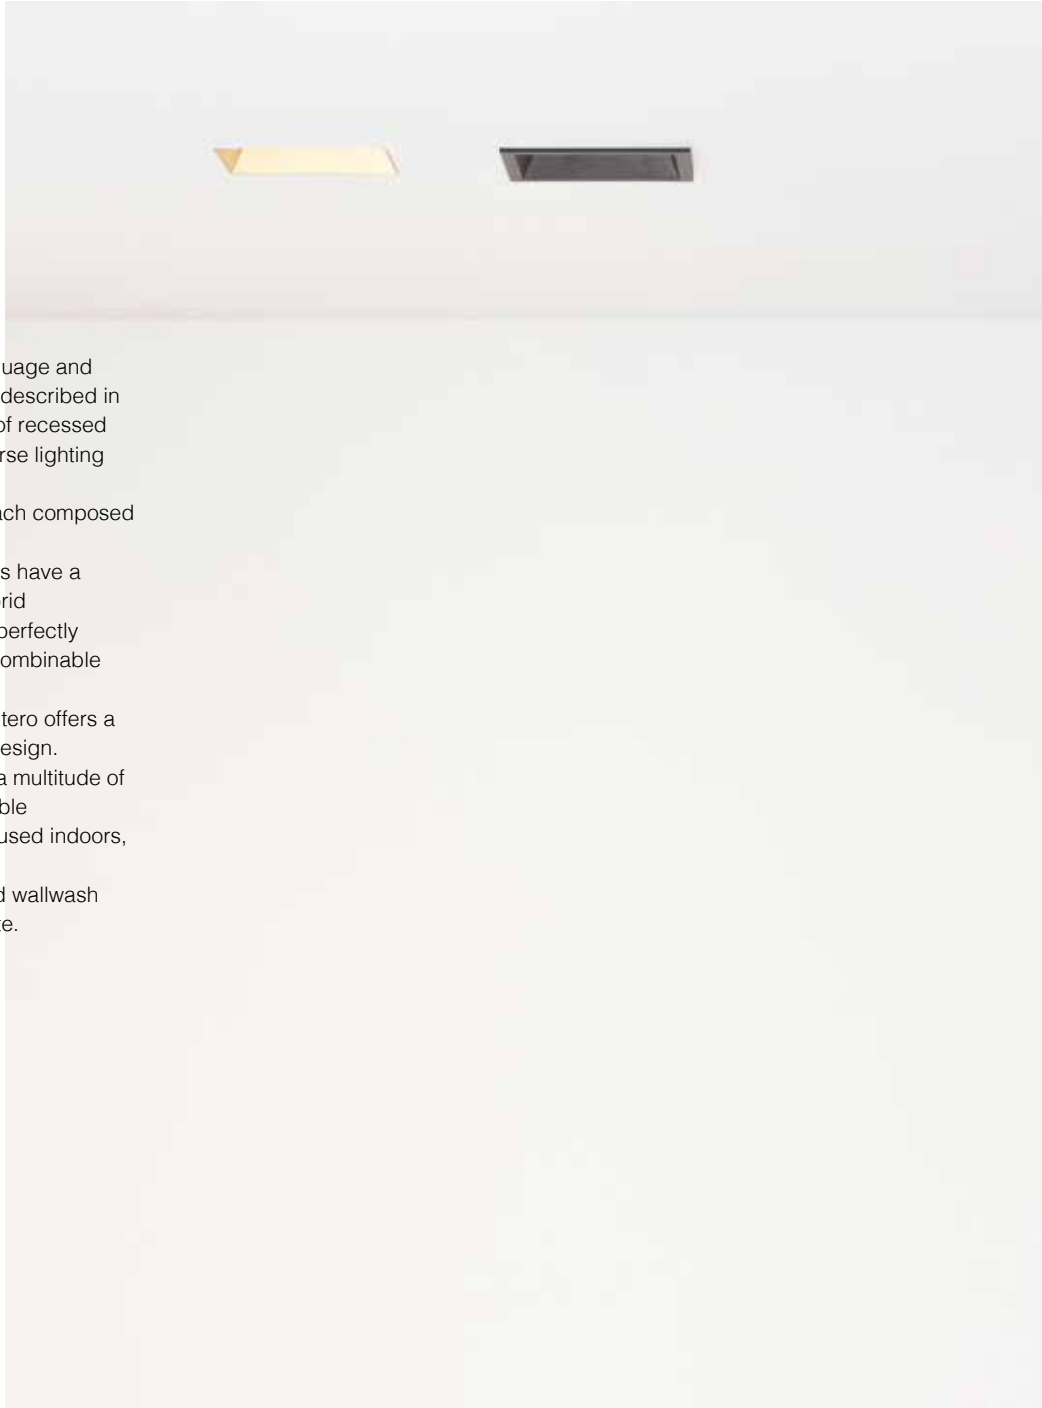

Entero is derived from the Spanish language and means "complete". A perfect summary described in 1 word, as Entero is a complete family of recessed downlights providing a solution for diverse lighting dilemmas.

The bases of Entero are 3 light units, each composed of a high-quality LED and a hybrid optical compartment. The different LEDs have a uniform colour consistency and the hybrid optics provide a comfortable light with perfectly outlined beams, making Entero easily combinable throughout an entire project.

Starting from the different light units, Entero offers a series of options in a round or square design.

Available in different power levels with a multitude of beam angles, Entero comes as adjustable luminaires - with or without trim – to be used indoors, outdoors and in damp locations.

Options as Soft Dim, Tunable White and wallwash lighting make the Entero family complete.

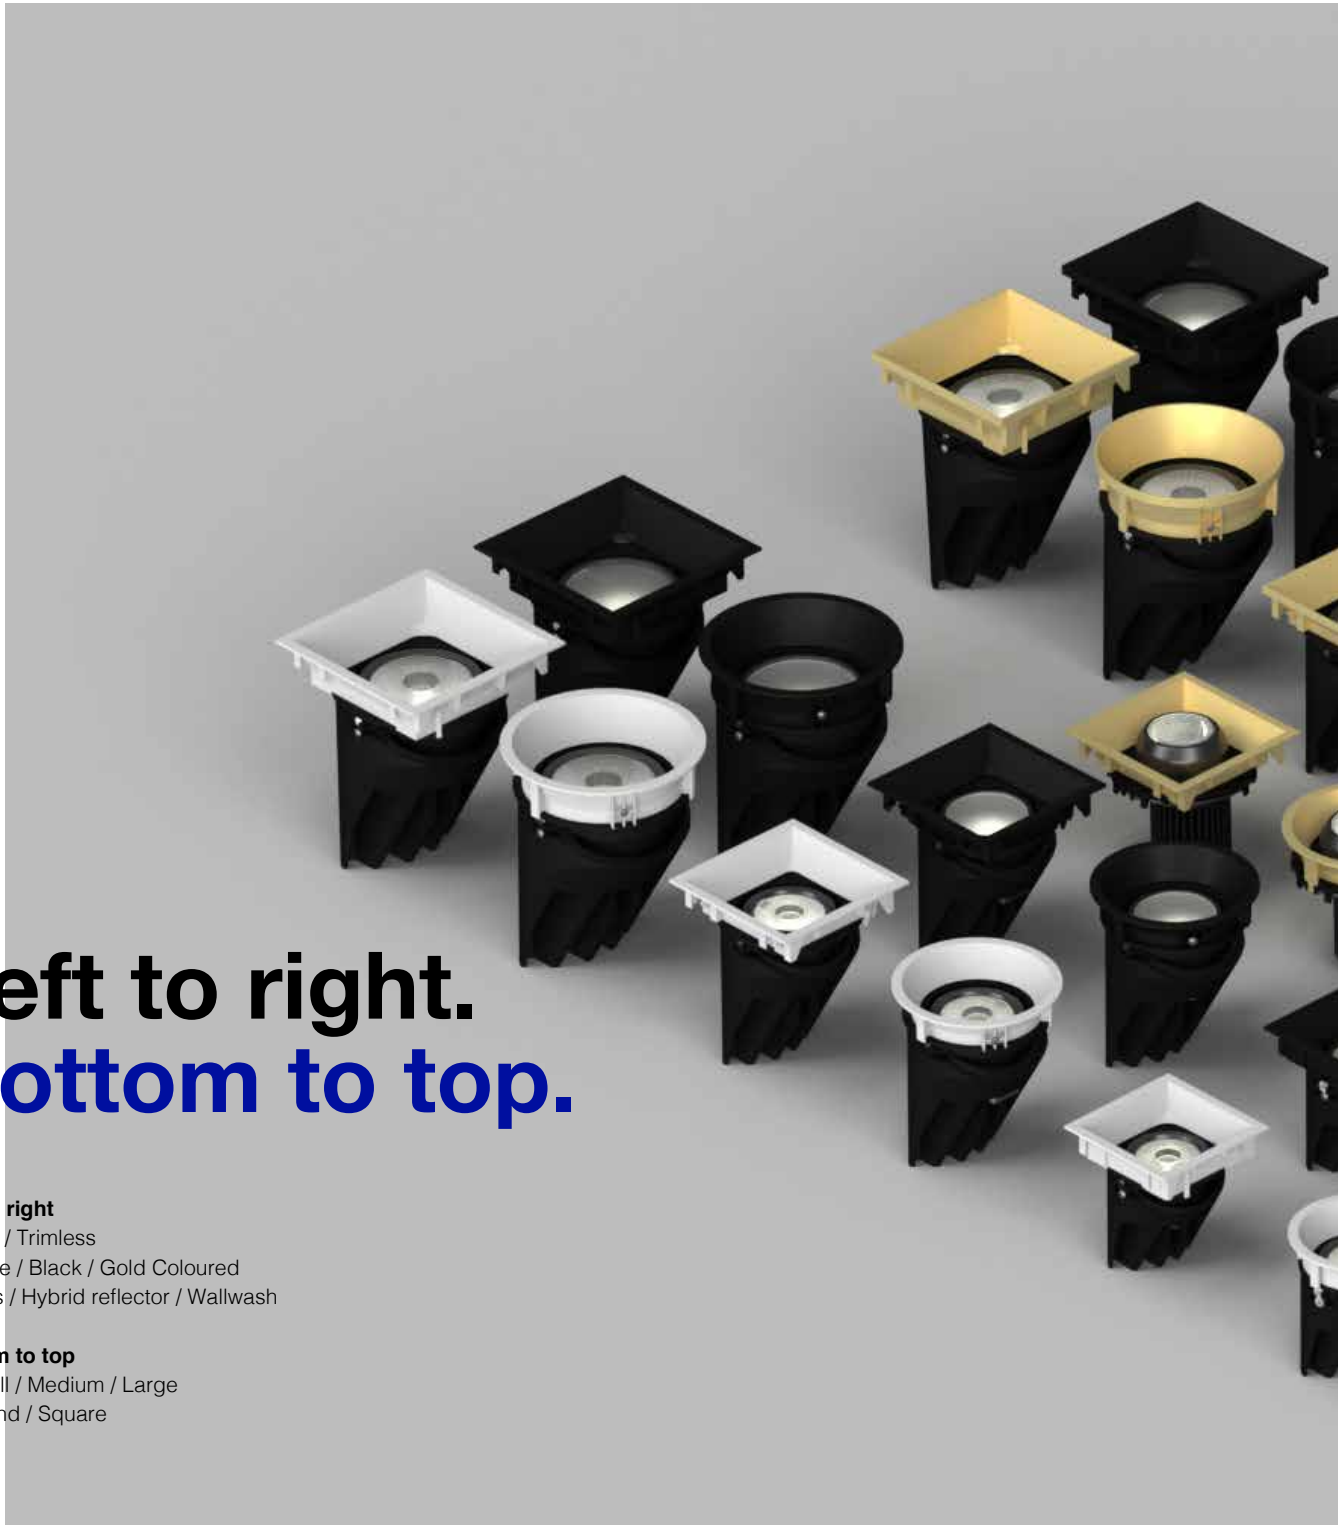

Variety in Unity.

Although uniform in design, variety is key within the Entero range. Variety in installation, variety in shape and size, variety in application, in colour, in type of LED, in power, in light distribution, variety in light refining accessories ... all within the same distinctive look and feel of Entero.

Entero, the blueprint.

HEATSINK ●

- Engineered for optimal heat dissipation - up to 36,5W
- Sloped design to allow installation in multiple ceiling types
- Orientable 0-355°
- Tilttable up to 30°
- Possibility to lock into a fixed position

OPTICS ●

Interchangeable hybrid optics

- Spot, Medium, Flood
- No visible LED while maintaining the look and feel of a reflector
- Optimal colour mixing thanks to the domed shape lens
- Minimal spill light as there is full control over the light thanks to the double optics

Lens

- Superspot
- Completely controlled light beam
- Precise beam angle
- Sharp cut-off

Reflector

- Wallwash
- Bartenbach Technology
- Precise and uniform vertical illumination

LED ENGINE

Monochrome

- Colour Rendering Index 90
- Colour Consistency 1 SDCM
- Lifetime L90 B10 50.000h

Led Engine. The beating heart.

Together with the optical compartment, the LED engine is the beating heart of the luminaire. That's why only the best is good enough to use within the Entero range. Throughout the range advanced Bridgelux LED engines are being used, delivering high performance, maximum efficacy and high-quality illumination. A colour consistency of 1 step MacAdam, Soft Dim and Tunable White are some of the key aspects that make this a strong heart.

TUNABLE WHITE

Since its creation, Delta Light has embraced a continuous innovation process to integrate the latest technological developments towards fixtures characterized by good colour consistency, glare mitigation, design and aesthetics. These aspects satisfy the functionality of the lighting installation and create a pleasant ambient to affect the emotions of the end-user in a positive way. Apart from the visual aspect this can also impact the circadian rhythm, as Entero Tunable White can do.

The circadian clock regulates processes such as the melatonin secretion - a hormone responsible for the sleep – and our concentration and level of alertness. The change in the working places towards indoor spaces isolates us from the natural stimulus of sunlight and therefore our circadian clock needs to be stimulated by artificial lighting emulating the daylight cycle. Entero Tunable White is an example of a luminaire that is able to simulate daylight by changing the colour temperature during the day.

SOFT DIM

Soft Dim LED technology replicates the dimming behaviour of a conventional lamp where the colour temperature increases in warmth as it is being dimmed. Within the Entero range, Soft Dim is available in multiple beam angles and dims down from 3000K to 1800K. This can be done by conventional phase dimming as well as 1-10V or DALI dimming.

LENS FOR SUPERSPOT

To achieve the narrowest beam angle within the Entero range, we enclose the small LED chip in the center of a lens. As such, every light beam coming from the LED is being captured by the lens and guided into the desired direction. The result is a nicely delineated beam angle of 10° with a sharp cut-off, perfect to highlight the smallest objects or to create dramatic sceneries.

LENS

SUPERSPOT

| | |
|----------|-----|
| S | 10° |
| M | 10° |
| L | 10° |

INTERCHANGEABLE HYBRID OPTICS FOR SPOT / MEDIUM / FLOOD

While the superspot version makes use of a lens, Entero uses hybrid optics for the other beam angles. Hybrid as the optical compartment combines a high-efficient reflector with a small dome covering the LED. The dome serves as a mixing chamber to offer an optimal colour consistency, even when using Tunable White and Soft Dim. Next to this, it reduces the spill light to a minimum and makes the yellow LED less visible while maintaining the look and feel of a reflector luminaire. The reflector on the other hand serves to boost the efficiency to a maximum, as its high reflectance surface emits all rays of light coming from the dome in the desired direction.

HYBRIDE REFLECTOR

SPOT

| | |
|----------|-----|
| S | 20° |
| M | 18° |
| L | 18° |

MEDIUM

| | |
|----------|-----|
| S | - |
| M | 30° |
| L | 30° |

FLOOD

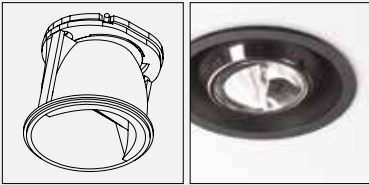

| | |
|----------|-----|
| S | 45° |
| M | 45° |
| L | 45° |

The build-up of the Entero range with hybrid optics allows for an easy interchangeability, the optical compartment can be removed easily and be replaced by another beam angle if needed, completely toolfree.

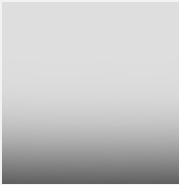

REFLECTOR FOR WALLWASH

Apart from the symmetrical beam angles, Entero also offers an asymmetrical curve for vertical illumination. The Bartenbach reflector inside the Entero wallwash is specifically designed for recessed downlights, creating a uniform effect on vertical surfaces together with some horizontal pathway lighting.

REFLECTOR

WALLWASH

| | |
|----------|---|
| S | ✓ |
| M | ✓ |
| L | - |

Entero Wallwash is optimized for perfect vertical illumination from top to bottom. The specific design of the reflector even allows for bigger distances in between the luminaires, as the light coming out of the luminaire is guided forward and sideward in the best possible way. For a perfect uniform lit surface, the formulas below can be used to generate the best possible light setting.

Bartenbach Technology.

For uniform wall washing.

Next to the 4 symmetrical beam angles, Entero also offers wallwash optics for an even illumination of vertical surfaces. Making use of the patented Bartenbach optic, Entero wallwash succeeds in generating a perfectly uniform lit surface with a luminaire that is completely recessed into the ceiling. In the Entero philosophy, the wallwash version comes in different shapes, sizes and installation options, perfect to fit in any lighting project.

Adjust the beam to your needs.

To offer even more flexibility and design freedom to the lighting designer, within Entero a range of light refining accessories is available to alter the light effect to the specific needs of the setting.

A honeycomb to further minimize the direct glare from the light source, a sandblasted glass to create a diffuse general light effect and 3 specific lenses to either create a more oval or a wider light distribution or to smoothen the edges and create a softer transition. Up to 2 accessories can be combined.

Ceiling Compatibility.

Entero is not only easy to use due to its infinite possibilities, its different installation options make it an easy to use lighting tool for lighting designers and specifiers also. Either with or without additional installation kit, Entero can be installed in several ceiling types as system ceilings, plasterboard ceilings, wooden and concrete ceilings and even stretched ceilings.

Two types of springs serve for installation in either hollow or concrete ceilings. As a standard, Entero Round comes with springs for hollow ceiling, optional a set of springs for concrete ceilings is available.

Installation of Entero Round M in hollow ceiling

Installation of Entero Round M in concrete ceiling

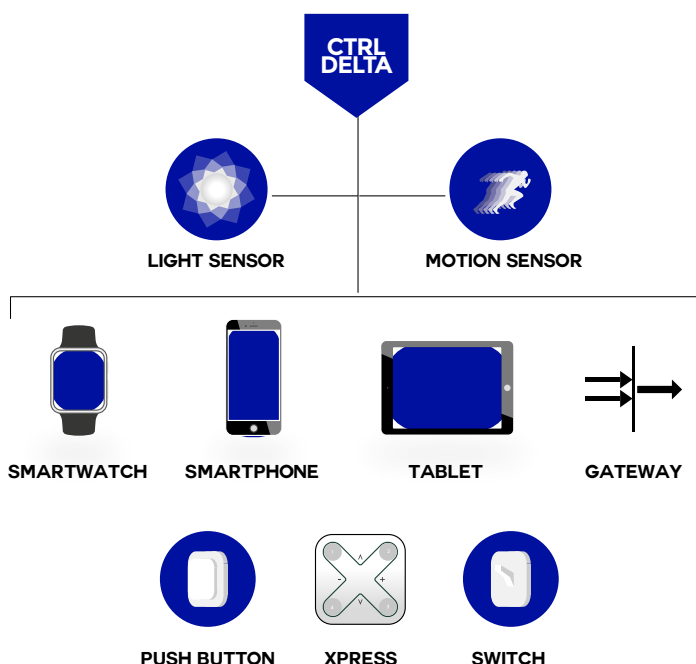

Entero connected.

Standard, all Entero luminaires come without power supply, offering a range of possibilities in the way of controlling the light. Be it to use in simple switch on-switch off settings, for dimmable sceneries or to manage everything from the Building Management System, solutions are available for both small and bigger installations.

This also allows for connected and interacting lighting schemes to be created. Simple residential settings can be controlled wireless with CTRL Delta, while bigger installations have the possibility to use the DALI-2 protocol and let the lights be controlled by sensors and interact with its surroundings. More information on power supplies and its dimming possibilities can be found in the technical chapter.

EASY TO INSTALL.

You don't need any new wiring, switches, devices or networks. Plug in the lighting fixture and pair it with your smartphone or tablet. No other configurations needed.

EASY TO USE.

You can control your lights with an intuitive and visual user interface on your smartphone or tablet.

EASY TO ENJOY.

With a tap on your smartphone you can set the ambience. With the Casambi App you can control your luminaires individual or in groups.

Reliability for Xterior use.

The diversity within the Entero family makes it a versatile range, suitable for a multitude of applications and to fulfill various kinds of lighting needs.

Apart from interior use, Entero can also be installed in exterior settings, this to create a uniform look and feel throughout the entire project. To ensure a hassle-free answer to these harsh environments, Entero X is designed to perfection in every detail.

Waterproof IP65 luminaire thanks to seal out of EPDM rubber

-

IK06 thanks to 4mm thick glass

-

UV-resistant components for extended lifespan

-

PC front cover for high impact & weather resistance

-

Optimized flexibility:
Tilting up to 20° & Rotating up to 355°

-

Possibility to add accessories without opening the fixture

-

What if there is **only**

to illuminate life and art?
to illuminate architecture and objects?
to illuminate with power and atmosphere?
to illuminate horizontal and vertical?
to illuminate outside and inside?
to illuminate from low and high?

one.

Any Project Size Need

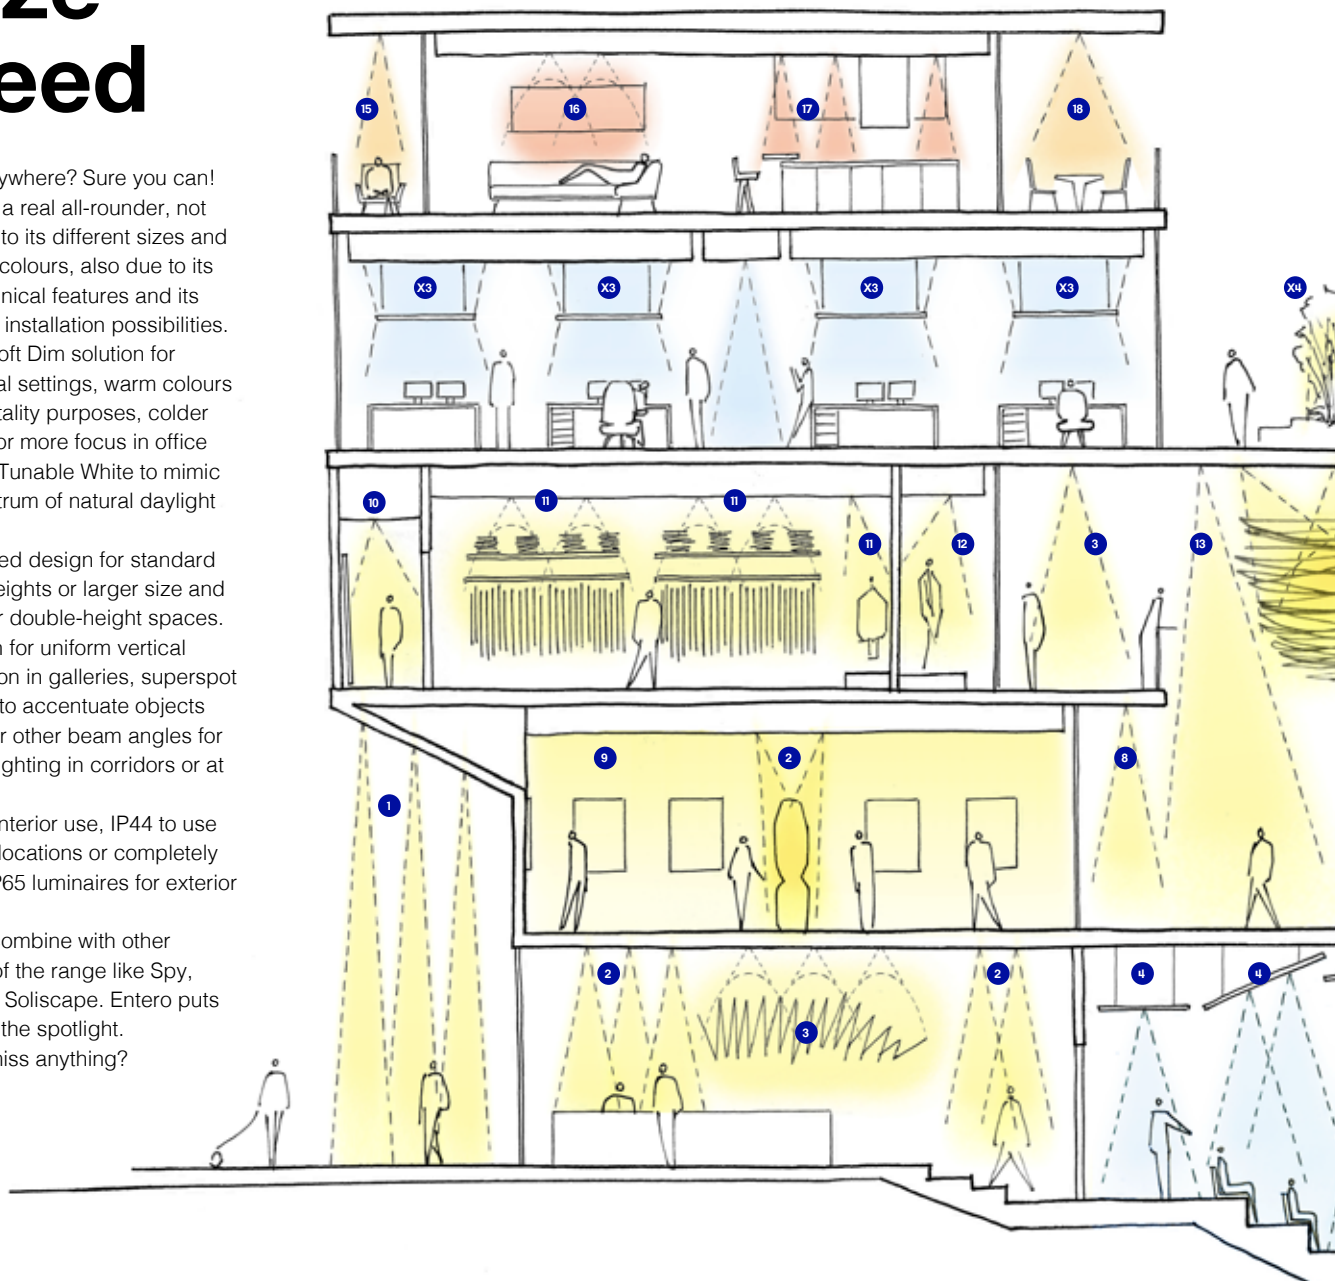

Use it anywhere? Sure you can! Entero is a real all-rounder, not only due to its different sizes and finishing colours, also due to its light technical features and its variety in installation possibilities. A cosy Soft Dim solution for residential settings, warm colours for hospitality purposes, colder colours for more focus in office areas or Tunable White to mimic the spectrum of natural daylight inside.

Small sized design for standard ceiling heights or larger size and power for double-height spaces. Wallwash for uniform vertical illumination in galleries, superspot versions to accentuate objects in retail or other beam angles for general lighting in corridors or at home.

IP20 for interior use, IP44 to use in damp locations or completely sealed IP65 luminaires for exterior use.

Easy to combine with other families of the range like Spy, Inform or Soliscape. Entero puts others in the spotlight.

SOLISCAPE

One to combine.

Entero can perfectly be used on its own throughout a project, but it can easily be combined with other families of the Delta Light range as well.

With Soliscape or Spy for example, as Entero uses the same LED engines and type of optics that are being used in throughout the Spy range or within the Soliscape spot modules.

Or use it together with Inform in office settings, where Inform guarantees pleasant desk lighting and Entero backs up for the general lighting in corridors or meeting rooms.

WIRELESS CONTROL

Delta Light introduces **CTRL DELTA**, enabling you to control and manage a selection of LED luminaires via mobile devices (Apple or Android). In essence, all dimmable luminaires can be wireless controlled, as long as the required components are either integrated or installed externally. Throughout this Lighting Bible®, the symbols below show if wireless control is possible with the luminaire in question.

CTRL DELTA INSIDE
WIRELESS CONTROL IS STANDARD AND THE LUMINAIRE HAS THE REQUIRED COMPONENT INTEGRATED.

CTRL DELTA READY
LUMINAIRE CAN BE WIRELESS CONTROLLED, BUT REQUIRES AN EXTERNAL COMPONENT. IN ORDER TO ENSURE THE BEST INTERACTION, THIS COMPONENT NEEDS TO BE INSTALLED NEARBY THE LUMINAIRE. INSTALLATION OPTIONS NEED TO BE CHECKED ACCORDING TO THE NATURE OF THE LUMINAIRE AND THE INSTALLATION POSSIBILITIES.

Easy to install. You don't need any new wiring, switches, devices or networks. Plug in the lighting fixture and pair it with your smartphone or tablet. No other configurations needed.

Easy to use. You can control your lights with an intuitive and visual user interface on your smartphone or tablet.

Easy to enjoy. With a tap on your smartphone you can set the ambience. With the Casambi App you can control your luminaires individual or in groups.

How to in 5 easy steps

1. Order your desired CTRL DELTA unit (not standard included with luminaire)
2. Install the CTRL DELTA unit
3. Download the Casambi App in the App or Play Store.
4. Find your CTRL DELTA unit in the Casambi app, using Bluetooth.
5. Take a picture of your room and place the light controls upon the related pictures. Now you can visually manage your luminaires directly through the picture.

For more information and technical info please go to www.deltalight.com/CTRLDELTA

LED Specifications.

At Delta Light®, we follow the evolution in LED at close range. What appears to be similar quality at first sight, can be totally different when looking at some of the underlying characteristics. These characteristics, like binning, risk factor, thermal management, degradation in luminous flux are part of the DNA of the Light Emitting Diode. These aspects determine the lifespan and the quality of the LED. For this matter, Delta Light® assures it only selects qualitative LEDs from qualitative manufacturers. High quality design cannot be made without high quality components.

COLOUR BINNING

No 2 LEDs are the same. When LEDs are produced, they vary in light output and in colour temperature, even when they are produced in the same batch. These differences may be small, but they do influence the quality of the LED. That is why manufacturers sort the LEDs, according to these performances, in different 'bins'. By reducing the number of bins to choose from, quality increases as performances are closer to each other.

MACADAM STEP

The differences in colour temperature between LEDs can be measured by looking at the MacAdam ellipses in Standard Deviation of Colour Matching (SDCM), according to the CIE 1931 Standard. This system looks at the ability of the human eye to perceive colour differences and ranks it on a scale from 0 to 10. Within 1 MacAdam ellipse a colour difference is not noticeable to the human eye under any condition. From 1 to 3 ellipses it is very difficult for the human eye to notice any difference in colour, meaning that up to 3 MacAdam ellipses all LEDs are very homogeneous when it comes to colour temperature.

RISK FACTOR

The European standard for photo biological safety EN 62471 describes a measuring method to determine whether a lamp or luminaire carries a risk of eye and skin damage. LED light contains almost no light from the ultraviolet or infrared spectrum, and therefore is not dangerous to the skin. It does however provide a high peak in the blue spectrum which, when looking into a bright light source (for a long period of time), may result in irreversible damage to the retina, the so-called the Blue Light Hazard.

Whether the risk is real, depends on several factors: luminance of the LED, colour temperature, but also light distribution and distance to the luminaire play an important role. When a LED is placed in a luminaire, it is located behind a lens, reflector or diffuser, thus levelling off the luminance.

To allow users to estimate the risk, the standard EN 62471 determines that lamps and luminaires must be divided into four risk groups:

- Risk group 0 ("exempt" group): this means that there is no danger, even with unlimited viewing of the light source.
- Risk group 1: The risk is limited, no more than 10,000 seconds of viewing is allowed (just under 3 hours).
- Risk group 2: up to 100 seconds of viewing is allowed.
- Risk group 3: up to 0.25 seconds of viewing is allowed. This is shorter than the natural aversion reflex of the eye.

For light sources of risk group 3, protective measures are always needed. For the other groups, it depends on the application. If the light sources belong in group 2 or 3, then this must be indicated.

LED LIFESPAN LM-80 – TM-21

Conventional light sources mostly burn out before a serious loss of light output is noticeable. As the lifetime of LEDs exceeds the lifetime of conventional light sources, light output degrades over time before burning out. This degradation in luminous flux can be measured according to the L value and the operating period of time:

- L value shows the percentage of luminous flux regarding the initial luminous flux over a period of time.
- The operating period of time, expressed in hours.

Example: L₇₀ 60.000h means that after 60.000 hours the luminous flux will be at least 70% of the original luminous flux.

All the technical parameters for LED-apply to the entire module. In view of the complex manufacturing process for light emitting diodes (LED), the typical values given in this **Lighting Bible®** are merely statistical values that do not necessarily correspond to the actual technical parameters of an individual product; individual products may vary from the typical values. For most accurate info, please consult: www.deltalight.com/ledspecs.pdf

All lumen values in this catalogue are related to the Led units. For more info on the lumen values of the products please visit our website www.deltalight.com

Emergency units are battery powered units that come into force in case of general power failure. In this Lighting Bible we offer emergency units specifically for LED luminaires. Thanks to the battery, a luminaire can keep emitting an amount of light, equal to a percentage of the nominal value when the luminaire is emitting at full power. This percentage is determined by the emergency unit and is known as the Ballast-Lumen Factor (BLF). More info on this Ballast Lumen Factor can be found on PAG TEC 16-17 based on the type of LED.
