

# Femtoline

The freedom to accentuate architectural structures

# FENTOLINE

- Full made-to-measure lighting solution
- Ultra-minimalistic design
- Surface mounted, trim and trimless recessed profiles
- Cove, wall graze or other creative applications
- IP65 solutions for wet areas and outdoor use
- 5W/m to 22W/m high output ledflex with CRI 90
- Tunable white, RGB, 2700, 3000 and 4000K

# FEMTOLINE

25/35/45/55

The range of Femtoline profiles is very extensive, with each family member having its own specific design and application area. Small or wider profile design, down or down-up lighting, wall, ceiling or floor mounted, flush or tilted plexi, ... the Femtoline family offers a solution to any lighting problem.

FEMTOLINE 25F & 25

## FEMTOLINE 25

The smallest of the range for surface mounted lighting solutions. Femtoline 25 offers 3 ways of general lighting: standard with a semi-recessed plexi that creates both direct and indirect lighting, Femtoline 25 F with a flush plexi for direct lighting and Femtoline 25 T with a tilted plexi to create an asymmetric light effect.

FEMTOLINE 25 T & 25 TP

FEMTOLINE 35

## FEMTOLINE 35

The most versatile of the range. Similar as with Femtoline 25, one can opt for direct lighting with Femtoline 35 or a more indirect general lighting with Femtoline 35 F. Furthermore, Femtoline 35 can also be used within the trimless Femtoline 35 TR profile, creating a black cover filled with strokes of light. As a pendant for down or down-up lighting, one can either opt for the straightforward Femtoline 35 F HE D-U or the more pronounced Femtoline 35 X D-U with its A-shaped design that hides away the plexi from below.

FEMTOLINE 35 X DOWN-UP

### FEMTOLINE 45

The recessed solution. Femtoline 45 complements the Femtoline 25 range in applications that allow recessed installation.

### FEMTOLINE 55

The recessed solution. Femtoline 55 complements the Femtoline 25 range in applications that allow recessed installation.

FEMTOLINE W

### FEMTOLINE W

The wall mounted solution. Femtoline W is a very slim and multifunctional LED profile, which can be used in both interior and exterior lighting concepts. This wall mounted profile can be used for either up- or downlight, creating a cosy wall grazing effect. Femtoline W Down-Up is a bespoke wall mounted profile for direct-indirect illuminance on vertical surfaces. It also comes in fixed lengths of 600 and 1200mm.

FEMTOLINE W DOWN-UP

### FEMTOLINE WG

The in-house developed lens extrusion is designed to fulfill multiple functionalities to create the optimal grazing effect. First of all its specific shape generates a double light effect: in one direction it produces a small light beam to graze along the surface, even for higher walls, in the other direction the purpose is to widen the beam to obtain the same effect as wide as possible. Its second task is to do all of this without losing sight of the visual perception. Thanks to a special treatment of the lens, the LED dots of the LEDflex are being transformed into a uniform line of light without any obtrusive effect to the eye.

# CTRL DELTA

## WIRELESS CONTROL

An advanced lighting control solution based on the Bluetooth low energy standard. BLE is a state-of-the-art wireless technology. It is the only low power wireless technology available in all modern smartphones, tablets and smartwatches. This makes it the only mainstream wireless technology in the world. It is future proof and it is available now to control your lights.

For more information and technical info please go to
